Helping you determine the right tools to best prevent, manage and finance risk is where we make a difference to you. We get to know your industry's specific challenges and consult with you to establish proper goals with your security in mind. Then, we proactively help you use your insurance and risk management programs to manage the business concerns that keep you up at night: your profitability; your clients; your employees; and your business continuity.

Claim and Risk Control Services

Within Murray are teams of experienced specialists in the areas of claims, risk control and alternative market administration. Each provides varying levels of service based on your particular needs.

Traditional Insurance Clients – We provide value-added support services, including advocacy, claim support and loss prevention advice in tandem with your insurance company.

Traditional Insurance Clients Who Prefer More Control – Some of our clients prefer more involvement in their risk management programs for better control of their results. We provide services on behalf of insurance companies who understand the value of the Murray Securus personal approach.

Self-Insured Clients, Captives, Risk-Sharing Groups or Clients with Loss Sensitive Plans – We act as third-party administration claim administrators and risk control service providers on a primary basis and also offer these services as a "wrap around" to existing programs. Our approach can be modified to best support our clients' staff and individual service needs.

Workers' Compensation – The Murray Securus "Day One, Minute One" philosophy is a unique approach to workers' compensation. Our team of 10 associates is dedicated solely to helping employers prevent employee injuries and tightly manage every claim to successful resolution.

Alternative Risk

Businesses or Groups Looking for Alternatives to Traditional Insurance – When a non-traditional approach is the best option, our Alternative Risk Solutions team steps into action to evaluate your needs and provide options. Our services include marketing, underwriting, program management and claim and risk control services.
